

FloridienneChimie is a leading provider of stabilizing agents for use in the production of PVC. In order to accelerate the conversion from lead to CaZn based stabilizers, and to exclude any contamination, Floridienne Chimie decided to build a new factory.

Automation of 2 Powder and Granulation Lines:

- CPU 315-2DP
- 2 ET200M
- Profibus-DP
- MP377 Touch Panel
- 5 SEW drives
- Profibus DP/DP coupling
- ±300 I/O

## Automation of CaZn Lines

Floridienne Chimie s.a., Belgium, 02/2011 - 06/2011
