

Prosuma Group was established in 1966 as the "Société Ivoirienne de Promotion de Supermarchés", and opened its first 750 m² Nour Al Hayat supermarket that year. Since local production was at a very low level, the company soon became an importer and supermarket manager in Ivory Coast.

The main criteria for the selling area were:

- Electricity stabilisation with proper voltage stabilisation for equipment
- Autonomous air-conditioning
- Fire Fighting system (detection and extinction)
- Security system (alarm, detectors, video surveillance)
- decoration in accordance with Sony standards
