

After accidental fire occurred on the CRM in La Louvière, NLMK contacted IPS for establishing an emergency action plan on this equipment. IPS coordinated several experts on site to assess the possibility of repairing the CRM, technical implications, providing the necessary document to the insurer.

Several scenarios were identified and economically evaluated. Complete rebuild was validated, for which IPS is today performing a pre-FEED study.

CRM Rebuild

PRIMARY

BELGIUM

Principal project data

Rebuild of cold rolling mill after fire accident

Scope IPS

Masterplan

- Emergency action plan for quick restart
